

Fluconazole (floo-KON-a-zole)

Prevents and treats fungal infections.

Brand Name(s): Diflucan

There may be other brand names for this medicine.

When This Medicine Should Not Be Used:

This medicine is not right for everyone. Do not use it if you had an allergic reaction to fluconazole, or if you are pregnant.

How to Use This Medicine:

Topical, Compounded

- Your doctor will tell you how much medicine to use. Do not use more than directed.
- Topical Cream: Remove the cap and tamper evident foil from the tube. Gently squeeze the tube until cream is dispensed onto the affected area. Rub in.
- Wash hands thoroughly after use.
- Take all of the medicine in your prescription to clear up your infection, even if you feel better after the first few doses.
- Talk to your doctor or pharmacist if you have any questions.
- Store the medicine in the original container at room temperature, away from heat, moisture, and direct light.

Ask your doctor or pharmacist before using any other medicine, including over-the-counter medicines, vitamins, and herbal products.

Warnings While Using This Medicine:

It is not safe to take this medicine during pregnancy. It could harm an unborn baby. Tell your doctor right away if you become pregnant.

Possible Side Effects While Using This Medicine:

Call your doctor right away if you notice any of these side effects:

- Allergic reaction: Itching or hives, swelling in your face or hands, swelling or tingling in your mouth or throat, chest tightness, trouble breathing
- Blistering, peeling, or red skin rash
- Dark urine or pale stools, nausea, vomiting, loss of appetite, stomach pain, yellow skin or eyes
- Fast, pounding, or uneven heartbeat
- Unusual bleeding, bruising, or weakness

This medicine was compounded specifically for you in a pharmacy to fill the prescription your doctor wrote for you. It was specially made to meet your individual needs. If you have not done so, please discuss this medicine with your doctor to ensure that you understand (1) why you have been prescribed a compounded medicine, (2) how to properly take this medicine, and (3) the interactions, if any this medicine may have with any other medicines you are taking.

Compounding is a long standing pharmacy practice that allows doctors to treat their patients' individual needs without being restricted only to off-the-shelf medicines or devices. This medicine was prepared in a compounding pharmacy to meet the specifications ordered by your doctor.

1. Call your doctor if:

You experience any side effects.

You are taking additional medicines that may interact with this compounded medicine

You have allergies or other medical conditions that should be noted.

2. Call your pharmacist if:

Information on the label is not clear to you.

You have any concerns regarding precautions, ingredients or proper storage.

Our pharmacists will be happy to help with any additional questions or concerns.
