Call your doctor right away if you notice any of these side effects:

- Allergic reaction: Itching or hives, swelling in your face or hands, swelling or tingling in your mouth or throat, chest tightness, trouble breathing
- Burning, itching, stinging, redness, or irritation may occur. Contact your doctor if these effects persist or worsen.
- Changes in heart rhythm; Fast, pounding, or uneven heartbeat
- Nerve problems
- Hearing loss

This medicine was compounded specifically for you in a pharmacy to fill the prescription your doctor wrote for you. It was specially made to meet your individual needs. If you have not done so, please discuss this medicine with your doctor to ensure that you understand (1) why you have been prescribed a compounded medicine, (2) how to properly take this medicine, and (3) the interactions, if any this medicine may have with any other medicines you are taking.

Compounding is a long standing pharmacy practice that allows doctors to treat their patients' individual needs without being restricted only to off-the-shelf medicines or devices. This medicine was prepared in a compounding pharmacy to meet the specifications ordered by your doctor.

1. Call your doctor if:

You experience any side effects.

You are taking additional medicines that may interact with this compounded medicine

You have allergies or other medical conditions that should be noted.

2. Call your pharmacist if:

Information on the label is not clear to you.

You have any concerns regarding precautions, ingredients or proper storage.

Our pharmacists will be happy to help with any additional questions or concerns.
