FREQUENTLY ASKED QUESTIONS¹

What is EB-A7^{DR}?

EB-A7^{DR} is an oral capsule classified as a medical food, a unique category regulated by the FDA. Medical foods address the metabolic deficiencies associated with diseases to help manage chronic conditions, including pain and inflammation associated with osteoarthritis. Medical foods are intended for use under medical supervision.

What should I expect?

The active ingredients in EB-A7^{DR} work together to correct the deficiencies associated with osteoarthritis. Once your metabolic needs are met, you may begin to experience less pain and stiffness in your arthritic joints.

How do these medical foods compare to over-the-counter products?

Once ingested, many over-the-counter supplements require an activation step within the body. The ingredients in EB-A7^{DR} are already provided in their active forms, increasing the amount that enters the circulation and maximizing the potential for clinical benefit. The combination of active ingredients found in EB-A7^{DR}, at the prescribed doses, are available through your healthcare provider.

What are the side effects with EB-A7^{DR}?

The active pharmaceutical ingredients in EB-A7^{DR} are well tolerated and allergen, gluten and dye free. The most common complaints include mild upset stomach. If you experience this, try taking the capsules with food. If the problem persists, consult your provider.

Drug Interactions: EB-A7^{DR} may alter the metabolism and absorption of certain medications. Consult your physician before taking EB-A7^{DR} if you are currently taking an anticoagulant such as warfarin.

Precautions: EB-A7^{DR} contains SAME (S-Adenosyl methionine) and turmeric in medicinal doses and should not be taken if you have the following:

- Pregnant or breast feeding
- Planning for surgery
- Gallbladder problems
- Bipolar disorder

Please consult with your healthcare provider before taking.
